## *Focus On Customer's Ultimate Satisfaction*

### *Product Update ...*

At CBN we are proud of our long-term relationships with our customers and vendors alike. One such vendor relationship started over 10 years ago with Bahco Metal Cutting Band Saw Blades. Bahco has a long tradition of providing the highest quality blades that consistently deliver cost per cut savings.

They have a readily available staff that lends their hands-on expertise to identify the best combination of blade types and machine speeds to provide the best cuts on your material. Even difficult alloys like stainless, Inconel and Titanium are no problem for Bahco blades. From **Bi-Metal** to **Carbide Tipped** to general **Carbon** blades, contact Circle Bolt & Nut so you too can benefit from our partnership with Bahco, a true leader in the metal sawing industry.

### *In Memoriam:*

The Circle Bolt & Nut Family would like to acknowledge the passing of a Key person in the founding of the Company, Santino Gubbiotti (1925-2016)

Sincerely,

*James J Castellino*

President & CEO
